Re: T2K Completes Transition to Visiport® VP220.C2 Model, Ceases VP220.C Production

T2K produces the World's most comprehensive product line of spin window systems and is the leading manufacturer of spin window systems worldwide, under the Visiport® and DiscAir™ trademarks.

With the successful field record of the Visiport® Model VP220.C2, available in several configurations to suit the needs of machine tool builders and retrofit customers alike, the decision to cease production of Visiport® Model VP220.C has been made.

*As of June 1, 2014, the Visiport Model VP220.C model will not be available*

Replacement parts and service for all Visiport® VP220.C models in field use will continue to be available.
