Proto-Design Takes Delivery of Zeiss for Visiport® Parts Production

To improve inspection and through-put of parts produced by Proto-Design for Visiport spin window systems, the company has taken delivery of a Zeiss O-Inspect 442 multiple sensor coordinate measuring machine. Equipped with a VAST XXT tactile probe, camera, and confocal sensor, the OI-442 can process inspection programs quickly while maintaining a maximum permissible error of less than 2 microns.

Visiport® is the leading manufacturer of spin window systems worldwide, offering the most comprehensive product line of electric and pneumatic spin window systems.
